

In the Military, people do just about every kind of work that exists in civilian life. They are physical therapists, computer repair technicians, photographers and journalists, management analysts, auto mechanics, life scientists and more. Free job training is provided for many of the thousands of individual military jobs. If a particular type of work interests you, you can probably find it in the Military.

Most career fields contain both enlisted and officer jobs. Most career fields are available in several military Services. For more information, visit <http://todaysmilitary.com/working/career-fields-and-profiles> or speak with a recruiter.

**High-quality job training is provided right from the start.** After Basic Training, trainees typically attend Advanced Individual Training (AIT), where they learn the skills necessary to do specific jobs. AIT combines classroom and hands-on learning environments. Note: More than 2,300 colleges and universities recognize The American Council on Education’s certification of AIT courses for college credit.

**Can I choose my military job?** Your preferences DO have an influence on the job specialties you receive when you enlist, but the needs of the Military at the time and your Armed Services Vocational Aptitude Battery (ASVAB) test scores also affect your job assignment. You should ask a recruiter about all the specialties for which new recruits are eligible, based upon your ASVAB scores.

**Are all jobs in the Military open to women?** Yes, all positions including combat are open to women. The number of female service members is as follows:

% of Female Service Members	
Army	14%
Marine Corps	8%
Navy	18%
Air Force	19%
Coast Guard	13%

**What do all military jobs have in common?** Responsibility. Excellence. Pride. Service members are expected to perform their assigned duties with a high level of competence. Members need to be able to depend on each other. More often than not, the Military offers a surprising amount of responsibility early in a career. Leading a team or crew of six to seven people at age 20 is common; so is making tactical decisions on the spot — even at junior levels. Most military jobs offer the opportunity to mature quickly through responsibility.

**How many military jobs have civilian equivalents?** Most military careers have equivalents in the civilian world, but even roles exclusive to the Military teach discipline, teamwork and leadership — skills that are very appealing to civilian employers. All military jobs give service members an edge when they re-enter the civilian world. That’s because employers prize the things military veterans have learned — among them dependability, focus, extra effort, reliability and striving for excellence.

## Final Thoughts

No matter what your job is in the Military, there’s an opportunity to do it well and use newfound skills, while earning the respect of your peers and superiors. This nearly always leads to greater self-confidence and a sense of pride. Every job in the Military is important because everyone contributes to military readiness, and everyone helps protect the freedoms all Americans enjoy.
